MEASURE 2: SATISFACTION OF EMPLOYERS & STAKEHOLDERS INVOLVEMENT

(R4.2|R5.3|RA4.1)

SIUC Employer Satisfaction Survey for Initial Programs

BACKGROUND

In 2018, SIUC created the Employer Satisfaction Survey to be completed each spring semester by the principals of our completers throughout the region. Since SIUC does not receive information from ISBE about where completers are employed, a link is sent by email to the principals of our recent graduates (6 months to 3 years).

CRITERIA OF SUCCESS

The ratings on this survey are as follows: extremely satisfied, very satisfied, moderately satisfied, somewhat satisfied, and not very satisfied. These “scaled choices have been qualitatively defined using specific criteria aligned with key attributes” (CAEP, 2017) rather than using a numbered scale.

QUALITY ASSURANCE

The questions on this survey use direct language from the Illinois Professional Teaching Standards (IPTS) with which administrators are very familiar. The questions are also aligned to InTASC standards. While we did not conduct a pilot of these questions with administrators, these questions are directly from our Pre-Student Teaching Clinical Evaluation Rubric elements. We consulted a panel of experts in developing the rubric, conducted a pilot, and established inter-rater reliability in Fall 2017. We made modifications, as necessary, to the rubric before creating the survey in spring 2018. In addition, the questions on this survey are the same as the questions asked on the completer follow-up survey and candidate exit survey in order to make comparisons between employer satisfaction and completer confidence at graduation and as an in-service teacher.

SUPPORT FOR IMPROVEMENT

The Employer Satisfaction Survey is administered by SIUC using Live Text. This method allows the unit to analyze data trends systematically with program coordinators, clinical supervisors, and local stakeholders.
RESULTS and ANALYSIS

Due to the Covid 19 Pandemic, the survey was not administered for the 2020 nor the 2021 Cycle. School administrators were understaffed, and most schools were operating remotely. Data collection resumed spring 2022.

In 2022, five administrators completed the employer satisfaction survey while reflecting upon the performance of eight teachers who graduated from SIU within the last three years. The average ratings indicated that all areas were at 80% and above with the highest average ratings at 92% which indicated the employers were extremely satisfied in their employees’ ability to create a positive learning environment, to develop and maintain collaborative relationships, and to participate in professional dialogue and continuous learning. The lowest average ratings (84%) by employers indicated the employers were less satisfied with their teachers’ ability to appropriately use a variety of informal and formal assessments to evaluate the understanding, progress, and performance of the individual student and the class as a whole.

In 2023, eight administrators completed employer satisfaction survey while reflecting upon the performance of thirteen teachers who graduated from SIU within the last three years. The employer satisfaction ratings were between 70% and 80% in all areas. The highest average ratings pertained to the teachers’ abilities to create short-range and long-term plans (70%) and to create a positive learning environment (80%). The lowest average ratings indicated employers were less satisfied with the teachers’ abilities to participate in professional dialogue and continuous learning, as well as to appropriately use a wide variety of assessments.

*The low return rate on these surveys each year makes it difficult to generalize findings that can be useful for future programming.*
create short-range and long-term plans to achieve expectations for student learning (IPTS 3, InTASC 7)?

create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation (IPTS 4, InTASC 3)?

use a variety of communication modes, and create varied opportunities for all students to use effective written, verbal, nonverbal and visual communication (IPTS 6)?

appropriately use a variety of formal and informal assessments to evaluate the understanding, progress, and performance of the individual student and the class as a whole (IPTS 7, InTASC 6)?

use a variety of instructional strategies, including technology, to encourage diverse students’ development of critical thinking, problem solving, and performance skills (IPTS 5, InTASC 8)?

participate in professional dialogue and continuous learning to support their own development as a learner and a teacher (IPTS 9, InTASC 10)?

develop and maintain collaborative relationships with colleagues, parents/guardians, and the community to support student learning and wellbeing (IPTS 8, InTASC 9)?
